

## ELEKTROSTATİK TOZ BOYAMA SİSTEMLERİ / POWDER COATING SYSTEMS

Elektrostatik toz boyama, polimer tozlarının özel amaçlı tabanca içerisindeki kanallardan geçerken elektrostatik yüklenerek parçaya uygulanması ve ardından fırınlanması esasına dayanır. Kabin içerisinde boyanan parça genel olarak 200°C sıcaklıkta 10 dakika bekletilerek uygulama tamamlanmış olur.

*Electrostatic powder coating is based on the principle of applying polymer powders on the parts to be coated by means of electrostatic method then firing. It is generally applied as keeping for 10 minutes in 200°C.*
